Answers.instyle.com offers up-to-the-minute fashion and beauty advice from our editors. This topic sure got the message boards jumping!

**Q** Is mineral makeup really as good as people say? If so, what brands would you recommend?

**A** Fans of mineral-based foundations and blushes love the long-lasting formulas that give skin luminosity and good coverage without clogging pores. Detractors say that mineral makeup may irritate sensitive skin. Test a small amount of Bare Minerals, Jane Iredale or **Glo Minerals** products to see how your skin tolerates them. No negative reaction? Go for it.
